Guardian® - fall prevention window screens

Guardian® fall prevention screens create safe places for windows at height. Certain windows greater than 2.0m from the outside ground level need to meet the National Construction Code (NCC) fall prevention requirements*, by using a restricted opening device, or if you want to use the full extent of your windows an approved screen, such as Guardian® is essential.

Guardian mesh is bonded into a fully welded, heavy duty aluminium frame. Because Guardian features stainless steel mesh, it's low

← With Guardian's fine 304 stainless steel architectural mesh, views are seemingly unrestricted. It delivers greater natural airflow to help cool and freshen any room.

maintenance, and strong enough to stand up to the rigours of children and pets.

Its appearance is perfectly matched to our ForceField® security screens for the ultimate in full home protection. All Prowler Proof screens come with a full 10 year replacement warranty.

*Talk to your local Prowler Proof dealer for more information on fall prevention window requirements.
